BOSTON BEER REPORTS FOURTH QUARTER 2014 RESULTS

BOSTON, MA (2/24/15) — The Boston Beer Company, Inc. (NYSE: SAM) reported fourth quarter 2014 net revenue of \$217.8 million, an increase of \$12.4 million or 6% over the same period last year, mainly due to core shipment growth of 4%. Net income for the fourth quarter was \$19.1 million, or \$1.40 per diluted share, an increase of \$1.0 million or \$0.7 per diluted share from the fourth quarter of 2013. This increase was primarily due to shipment increases partially offset by a higher tax rate.

Earnings per diluted share for the 52-week period ended December 27, 2014 were \$6.69, an increase of \$1.51, or 29%, from the comparable 52-week period in 2013. Net revenue for the 52-week period ended December 27, 2014 was \$903.0 million, an increase of \$163.9 million, or 22%, from the comparable 52-week period in 2013.

Highlights of this release include:

- Depletions grew 13% and 22% from the comparable 13 and 52 week periods in the prior year.
- Gross margin for the fourth quarter was 50% and the fiscal 2014 full-year was 51.5%.
- Advertising, promotional and selling expenses were flat in the quarter compared to the fourth quarter of 2013 and increased \$42.8 million or 21% for the full year 2014, primarily due to planned increased investments behind the Company's brands.
- Full year 2014 capital spending totaled \$151.8 million, most of which relates to continued investments in the Company's breweries and additional keg purchases.
- Full year 2015 depletion growth is estimated to be between 8% and 12% and full year 2015 earnings per diluted share is estimated to be between \$7.10 and \$7.50.
- Based on the estimated 2015 and future growth, current estimates of full-year 2015 capital spending now range between \$80 million and \$110 million.

Jim Koch, Chairman and Founder of the Company, commented, "I am pleased with our depletion growth in 2014 and that The Boston Beer Company after 30 years of brewing continues to help lead the craft beer industry both in innovation and variety. Our drinkers still get excited by our beers, and our growth is attributable to great beer innovation, coupled with strong sales execution and support from our distributors and retailers. I am especially proud of our employees for growing Samuel Adams in a very competitive environment and learning to brew, manage and sell a more complicated portfolio. At the end of the fourth quarter, we had a smooth transition to our spring seasonal Samuel Adams Cold Snap, which is in its second year. Cold Snap is a unique and approachable

white ale brewed with a blend of exotic spices that has been well received by drinkers and retailers alike. In the first quarter we began a national rollout of our new session IPA, Samuel Adams Rebel Rider IPA and our new double IPA, Samuel Adams Rebel Rouser IPA, which we expect will complement Samuel Adams Rebel IPA, which had a successful launch in 2014. We remain confident about the long-term outlook for the craft category and our Samuel Adams brand."

Martin Roper, the Company's President and CEO stated, "In the fourth quarter, our depletions growth remained strong and benefited from growth in our Samuel Adams, Twisted Tea, Angry Orchard and Traveler brands. As we anticipated, depletions growth rates slowed from earlier in the year as we faced tougher comparables and we did not benefit from new product launches as we did earlier in the year. In the fourth quarter we had lower sales and marketing spending and higher shipments than expected, which resulted in higher earnings than anticipated. Looking forward, we are excited, but expect the competitive environment to be tougher. We therefore anticipate the need to increase investing in advertising, promotional and selling expenses behind existing brands and to support national rollouts of brands and test future innovations. We remain committed to investment in innovation, commensurate with the opportunities and the increased competitive activity that we see. With the launch of several new beers and ciders in the first quarter of 2015, and our planned increased investment behind Samuel Adams, Twisted Tea, Angry Orchard and Traveler brands, we believe we are well-positioned to maintain our momentum."

Mr. Roper went on to say, "Over the past two years, our supply chain struggled under unexpected increased demand and we experienced higher operational and freight costs than we had planned. During that period, we completed significant capital and efficiency projects that increased our capacity and capabilities. Our focus for 2015 will be to take full advantage of these increased capabilities through improved training, stable scheduling, and operating efficiency and reliability improvements. We will also continue to make supply chain improvements intended to improve the freshness of our beers and enhance our customer service. As we absorb and optimize our 2013 and 2014 investments, we are slowing the pace of our capital expansion. Our sales focus in 2015 will be to ensure successful second year growth of our 2014 launches, and to support the national launch of our Traveler brand. Looking forward, we expect to maintain a high level of brand investment, as we pursue sustainable growth and innovation, and we remain prepared to forsake the earnings that may be lost as a result of these investments in the short term, as we pursue long term profitable growth."

4th Quarter 2014 Summary of Results

Depletions grew 13% from the comparable 13-week period in the prior year, reflecting increases across the Angry Orchard[®], Twisted Tea[®], Samuel Adams[®] and Traveler[®] brands.

Core shipment volume was approximately 983,000 barrels, a 4% increase over the fourth quarter of 2013.

Fourth quarter shipment growth rates were lower than depletions growth rates, primarily due to timing of shipments and a decrease in distributor inventories. The Company believes distributor inventory at December 27, 2014 was at an appropriate level. Inventory at distributors participating in the Freshest Beer Program at December 27, 2014 decreased slightly in terms of days of inventory on hand when compared to December 28, 2013. The Company has approximately 68% of its volume on the Freshest Beer Program and it believes participation in the Program could reach 72% to 78% of its volume by the end of 2015.

Gross margin at 50% for the fourth quarter was lower than the 51% realized in the fourth quarter of the prior year, primarily due to higher brewery processing costs and unfavorable product mix effects that were partially offset by price increases.

Advertising, promotional and selling expenses were flat compared to the fourth quarter of 2013. Increases in local marketing, costs for additional sales personnel and freight to distributors due to higher volumes were offset by decreases in point of sale and media advertising due to the timing of these brand investments and new product launches during 2014 compared to the prior year.

General and administrative expenses increased by \$600,000 from the fourth quarter of 2013, primarily due to increases in salary costs that were partially offset by lower consulting costs.

The Company's effective tax rate for the fourth quarter increased to 39% from 37.5% in the fourth quarter of 2013 due to the full year unfavorable tax rate impact of bonus depreciation which was enacted during the fourth quarter of 2014.

Full Year 2014 Summary of Results

Depletions grew by 22% from the comparable 52-week period in 2013, reflecting increases across the Angry Orchard, Twisted Tea, Samuel Adams and Traveler brands.

Core shipment volume was approximately 4.1 million barrels, a 20% increase from the comparable 52-week period in 2013.

Advertising, promotional and selling expenses were \$42.8 million higher than costs incurred in the comparable 52-week period in 2013. The increase was primarily a result of increased investments in media advertising, increased costs for additional sales personnel and commissions, point of sale and local marketing, and increased freight to distributors due to higher volumes.

General and administrative expenses increased by \$3.6 million from the comparable 52-week period in 2013, primarily due to increases in salary costs.

The Company expects that its cash balance of \$76.4 million as of December 27, 2014, along with future operating cash flow and the Company's unused line of credit of \$150.0 million, will be sufficient to fund future cash requirements.

During the fourth quarter and the period from December 28, 2014 through February 20, 2015, the Company repurchased 31,900 shares of its Class A Common Stock for an aggregate purchase price of approximately \$8.6 million. As of February 20, 2015 the Company had approximately \$41.9 million remaining on the \$350.0 million share buyback expenditure limit set by the Board of Directors.

Depletion Estimates

Year-to-date depletions through the seven weeks ended February 14, 2015 are estimated by the Company to be up approximately 12% from the comparable period in 2014.

2015 Outlook

The Company currently projects full year 2015 earnings per diluted share to be between \$7.10 and \$7.50. The Company's actual 2015 earnings per share could vary significantly from the current projection. Underlying the Company's current 2015 projection are the following full-year estimates and targets:

- Depletions and shipments percentage growth of between 8% and 12%.
- National price increases of between 1% and 2%.
- Gross margin of between 51% and 53%.
- Increased investment in advertising, promotional and selling expenses of between \$25 million and \$35 million. This does not include any increases in freight costs for the shipment of products to the Company's distributors.
- Increased expenditures of between \$10 million to \$15 million for continued investment in Alchemy & Science brands, which are included in our full-year estimated increases in advertising, promotional and selling expenses. These estimates could change significantly and 2015 volume from these brands is unlikely to cover these and other potential Alchemy & Science brand investments.
- · Effective tax rate of approximately 38% based upon current tax laws and underlying regulations.
- Estimated capital spending of between \$80 million and \$110 million, which could be significantly higher, depending on capital required to meet future growth. These estimates include capital investments for existing Alchemy & Science projects of between \$3 million and \$5 million.

About the Company

The Boston Beer Company began in 1984 with a generations-old family recipe that Founder and Brewer Jim Koch uncovered in his father's attic. Inspired and unafraid to challenge conventional thinking about beer, Jim brought the recipe to life in his kitchen. Pleased with the results of his work, Jim decided to sample his beer with bars in Boston in the hopes that drinkers would appreciate the complex, full-flavored beer he brewed fresh in America. That beer was aptly named Samuel Adams Boston Lager®, in recognition of one of our nation's great founding fathers, a man of independent mind and spirit. Little did Jim know at the time, Samuel Adams Boston Lager would soon become a catalyst of the American craft beer revolution.

Today, The Boston Beer Company brews more than 60 styles of beer. It relentlessly pursues the development of new styles and the perfection of classic beers by searching the world for the finest ingredients. Using the traditional four vessel brewing process, the Company often takes extra steps like dry-hopping, barrel-aging and a secondary fermentation known as krausening. The Company has also pioneered another revolution, the 'extreme beer' movement, where it seeks to challenge drinker's perceptions of what beer can be. The Boston Beer Company has been committed to elevating the image of American craft beer by entering festivals and competitions around the globe, and is one of world's most awarded breweries at international beer competitions. As an independent company, brewing quality beer remains its single focus. Although Samuel Adams® beer is America's largest-selling craft beer, it accounts for only one percent of the U.S. beer market. The Boston Beer Company will continue its independently-minded quest to brew great beer and to advocate for the growth of craft beer across America. In addition to Samuel Adams beers and the other craft brands brewed by Alchemy & Science, its craft brew incubator, the Company's brands include Twisted Tea® and Angry Orchard® hard cider. For more information, please visit <u>www.samueladams.com</u>, <u>www.twistedtea.com</u>, <u>www.angryorchard.com</u>, and <u>www.alchemyandscience.com</u>.

Forward-Looking Statements

Statements made in this press release that state the Company's or management's intentions, hopes, beliefs, expectations or predictions of the future are forward-looking statements. It is important to note that the Company's actual results could differ materially from those projected in such forward-looking statements. Additional information concerning factors that could cause actual results to differ materially from those in the forward-looking statements is contained from time to time in the Company's SEC filings, including, but not limited to, the Company's report on Form 10-K for the years ended December 27, 2014 and December 28, 2013. Copies of these documents may be found on the Company's website, *www.bostonbeer.com*, or obtained by contacting the Company or the SEC.
